Investigate the directations of an accumultun and if its limits are evident, don't waste your youth and vitality at a handleap.

Some work, in contrast with other situations, pays a bigger initial wage but holds out slight prospect of promotion. Salary advances, after a white are only to be secured with the raise in living costs. Increases of that sort aren't actual—the set continues to be the same.

It's a plority chosen read that does not wider as it longthens. We have epenings for two young men in our Washington Service Station.

HELP WANTED-FEMALE MISS GREGORY'S TALKS TO YOUNG WOMEN

NUMBER THIRTY-FOUR "Weavers of spaceh" has been applied to telephone operators and it is a very apt metapher. "Annihilators of space" would be another good designation.

If it was not such a common occurrence, making inches out of miles for people who were in a hurry would cause many a broad smile on an operator's face, if she should stop and think that only a few years ago that which now takes minutes would require days to accomplish.

It is something all operators feel a pride in: this bringing together people hundreds of miles apart; it is these little interesting points that make telephone operating so interesting. There also the keen satisfaction of knowing that you are doing very essential work for your government.

The company pays students \$10.50 per week while learning and an average of sixty dollars a month the first year, with a constantly increasing scale there-

First-class meals are furnished at less than cost (10 cents each), Rest rooms and libraries and many other considerations of our girls' welfare make this vocation an ideal one.

Copies of these talks can be had in phamphlet form if desired. They are free for the askingsend postal or call Main 12000, Branch 97; or better still CALL AND TALK IT OVER
